github.com/ai-genai-agenticai-intelligence

Summary

AI Engineer skilled in Python, Machine Learning, Deep Learning, Generative AI, LLMs, RAG, SQL, TensorFlow, PyTorch, Scikit-learn, and LangChain. Experienced in building AI applications, predictive models, data pipelines, REST APIs, and intelligent solutions using Flask and Streamlit. Strong in EDA, feature engineering, model optimization, prompt engineering, and AI deployment.

Technical Skills

- **Programming:** Python, SQL, MySQL, PostgreSQL, NumPy, Pandas, Matplotlib, Seaborn
- **Data Science:** Data Cleaning, EDA, Statistics, Feature Engineering, Visualization, Model Evaluation
- **Machine Learning (ML):** Scikit-learn, XGBoost, LightGBM, Regression, Classification, K-Means, DBSCAN, PCA, SVR
- **Deep Learning:** TensorFlow, Keras, PyTorch, ANN, CNN, RNN, LSTM, Transformers
- **Computer Vision:** OpenCV, MediaPipe, YOLO, Object Detection, Classification, Segmentation
- **GenAI & LLMs:** GPT, Claude, Gemini, LLaMA, RAG, Prompt Engineering, LoRA, QLoRA, AI Agents
- **AI Frameworks:** LangChain, LangGraph, LangSmith, Hugging Face, OpenAI API, CrewAI
- **Databases:** PostgreSQL, MySQL, SQLite, ChromaDB, Qdrant, Pinecone
- **Deployment:** Git, GitHub, Docker, FastAPI, Flask, Streamlit, Gradio
- **BI & Tools:** Power BI, Tableau, Excel, VS Code, Jupyter, Google Colab

Projects

Enterprise IT Support Agentic RAG Copilot | *LangGraph, FastAPI, Pinecone, Groq LLM, Agentic RAG*

- Developed and deployed an enterprise IT Support Copilot using Agentic RAG workflows with LangGraph, FastAPI, Pinecone, and Groq LLM, enabling secure retrieval from private knowledge bases with fallback to external search.
- Implemented query routing, evidence grading, and retry logic to minimize hallucinations, improve answer grounding, and provide transparent decision-path auditing for 3,000+ employee use cases.
- **Cloud Deployment:** enterprise-it-support-agentic-rag-copilot-n6e8.onrender.com

Autonomous Multi-Agent AI Research System | *LangChain, Tavily, Groq, Gemini, OpenAI, Streamlit*

- Designed and implemented an autonomous multi-agent research pipeline orchestrating Search, Reader, Writer, and Critic agents to produce citation-backed intelligence reports using LangChain, Tavily Search, and multi-provider LLMs (Groq, Gemini, OpenAI).
- Built dual runtime modes (Streamlit web dashboard and CLI pipeline) with automated peer-review scoring, deep web scraping, and transparent quality auditing for enterprise-grade research automation.
- **Cloud Deployment:** multi-agent-research-assistant-1-jtam.onrender.com

Multi-Node Conversational AI Framework | *LangGraph, Groq API, Streamlit, TypedDict, REST APIs*

- Designed an asynchronous conversational pipeline using LangGraph StateGraph and TypedDict state schema to manage preprocessing, sentiment tagging, and conditional branch transitions.
- Integrated Groq-accelerated inference with streaming endpoints, maintaining context-rich conversation history across extended sessions with sub-second response times.
- **Cloud Deployment:** multi-node-conversational-ai-framework.streamlit.app

Certifications

Full Stack Data Science with Agentic AI | Naresh i Technologies **2026**

Education

SMIT Degree Engineering college Graduated: 2026

Bachelor of Engineering (B.E) **CGPA: 7.96 / 10**
